3-GSP

Street: Rue du Village, 69
City: 5081 Meux (La Bruyère)
Country: Belgium
Telephone:
Mobile: 0032473815836
First Name: François-Xavier
Last Name: Despret
Position: CEO
E-Mail: fx.despret@3-gsp.com

Description: 3-GSP has developed a unique tool to organise virtual remote meetings with a level of efficiency close to a face to face meeting. The service allows groups of people to share documents in real time, talk and see each other at the click of the mouse. Working remotely becomes as easy as picking up the phone, whether in a group of 2, 10 or more than 20.

The service is very easy to use, does not require any installation, is stable and offers a high level of security and sound quality. The service seamlessly integrates audio-, video- and web-conferencing and can be used on any PC (Windows, Linux, Mac, etc) with internet access, a web browser and Flash Player, a webcam and a telephone.

1. The company is based in Belgium
2. 3-GSP has developed the service based on its experience in IT, telephony and speech experience.
3. The main goal of the activity is to allow companies, cluster, partners in EEC projects... to enhance meeting efficiency by improving project coordination and management. Collaborative meeting allows frequent meetings at very low cost decreasing time and environmental effect of travelling.

Collaboration Profiles

Title: Collaborating tool for efficient meetings and projects management
What we offer: 3-GSP has developed a unique tool to organise virtual remote meetings .

1. Company has expertise in telephony and internet integration, voice and image treatment.
2. Innovation comes from the low level of bandwidth requested allowing the service to operate using from DSL to EDGE & 3G allowing complete mobility. The service runs w/o. installation (OS agnostic) and an exclusive video driven by a voice activity detector.
3. It is used for meetings, projects coordination, remote trainings, press conference, colloquies or interactive TV programs.
4. The service is very easy, does not requires any special equipment, investment or installation of plug-ins. The dual channel approach with voice over the phone and data via the web improves the resilience of the meeting because an attendee never fully loses touch with the meeting in case of a hiccup on either the Internet or phone network.

Collaboration sought: The telephone functions are totally integrated allowing full control of the phone functions. Commercial, Licence, Joint venture, Eureka EContec, FP7, R&D

What are we looking for

3-GSP is looking for companies involved in meeting process improvement, companies that are in charge or involved in the management of projects with partners from various environments. Typical projects are European projects involving companies from different countries. Partnership should be in line with vision of the service in the future to jointly create add-on for project management tools, dynamic meeting minutes, and content management; preferably based on open sources. Other way of enhancement is the "plasticity" of the solution allowing the same application to be accessed from mobile devices (smart phone) or at the other end from equipment based video conference.

3-GSP is looking for partners to includes our service in their portfolio. Ideal partner would have a complementary solution or offering solution involved in a process where our meeting solution fits. The partnership would then be technological (integration) and commercial (distribution).

Arkamys

Street: 5 rue Frédéric Bastiat
City: 75008 Paris
Country: France
Telephone:
Mobile: +33630708867
First Name: Jean-Michel
Last Name: Raczinski
Position: CTO
E-Mail: jmraczinski@arkamys.com

Description: Arkamys is a SME based in Paris, specialised in digital audio signal processing. Arkamys develops and provides digital audio solutions for professional entertainment and digital content development companies (cinema, music) and for the consumer electronics industry (mobile phones, TV, car audio, mp3 players, PVPs...)

Collaboration Profiles

Title: IMMERSE U / SOUND STAGING
What we offer: Immerse U is an innovative sound processing technology, resulting in cost-effective signal-processing algorithms that provide a convincing simulation of a multichannel-surround system on any audio output transducers (headphones or speakers).
Using innovative sound digitalization, breakthrough algorithms and new sound transfer functions, Immerse U
by Arkamys electronically creates a real sensation of complete immersion.
Through its innovative and patented technology, Immerse U by Arkamys transforms standard stereo listening in a true surround sound experience, delivering a new dimension in audio emotions with only two sound channels for mobile TV and gaming.

Sound Staging by Arkamys is the new audio generation for the automotive industry. By processing the audio samples without changing the loudspeaker setup, Sound Staging plunges car driver and passengers in a crystalclear and natural spaciousness.

Collaboration sought: Commercial, Licence, Eureka EContec, Eurostars, FP7, R&D
What are we looking for: Partners are sought with expertise in AEC and ANC

Asociación Madrid Plataforma Audiovisual

Street: José Abascal, 56, 3º
City: 28003 Madrid
Country: Spain
Telephone:
Mobile: +34610530617
First Name: Fernando
Last Name: Garcillán
Position: General Manager
E-Mail: fgarcillan@clusteraudiovisualmadrid.es

Description: Asociación Madrid Plataforma Audiovisual is an audiovisual cluster located in the capital of Spain, Madrid which focuses on Research and Development.

Collaboration Profiles

Title: Audiovisual Cluster Comunidad of Madrid
What we offer: Madrid audiovisual cluster is promoted by the authorities of the Community of Madrid and private companies in order to boost competitiveness in the digital audiovisual sector, strengthening creativity, talent, R&D&I and increasing its internationalization.

The Audiovisual Cluster is a new cluster in its first development phase. Its members are actively participating in the definition, promotion and launch of the cluster activities. The first Operative Plan has recently been approved.

The cluster is organized in 4 work groups: AUDIOVISUAL CONTENTS, improvement of local legislation to support. Detection of innovative products and services (interactive contents, contents with new technologies, IP TV, TV digital contents, DTT). Detection and definition of early demand projects for Madrid.

FINANCING. Development of

Collaboration sought: Eureka EContec, FP7
What are we looking for: Public Cooperation

atom STUDIO

Street: rue Hongrée, 6/4
City: 4000 Liège
Country: Belgium
Telephone:
Mobile: +32495900756
First Name: Christophe
Last Name: Sarlet
Position: Manager
E-Mail: mail@atomstudio.net

Description: Since 2004, atom STUDIO has been instrumental in developing the media vision for a

broad spectrum of domestic and international clients across a range of platforms that includes broadcast, pre-visualization and internet.

Collaboration Profiles

Title:	3D Modeling & Rendering
What we offer:	atom STUDIO is a digital film production company in the design and development of rendering and 3D modeling technology, company branding, broadcast design, in architecture, design, city or landscape planning project visualization and real-time viewer experiences. Our approach to communication for design is to use the same creative demand & digital FX techniques that are commonly used in broad audience media industries (advertising, motion picture, video games). We have built up a unique skill in producing CG animation films and original composite documents, for varied communication contexts, such as : public/corporate communication, real estate advertisement, validation processes... We can rely upon a full CG animation/image production line based on Autodesk 3dsMax, as well as a HD digital editing station (+DVD authoring). This framework is adapted to heavy productions while ensuring flexibility and compatibility with the most common industry design tools.
Collaboration sought:	Commercial
What are we looking for	We are looking for any kind of commercial partnership in several range of activities like : architectural engineering, medical asset, broadcast and media industries, car engineering... Indeed, in any domain where 3D visualization could bring a quantitative value to the product developed by the customer.

AVANE

Street:	55 avenue Marceau
City:	75116 Paris
Country:	France
Telephone:	
Mobile:	+33 607017065
First Name:	Gregory
Last Name:	GUENEAU
Position:	CEO
E-Mail:	gregory.gueneau@avane.com
Description:	AVANE offers a range of products and services in the field of project management.

AVANE propose une gamme de produits et de services dans le domaine du management de projets, de l'édition de solution de GroupWare aux publication sur le management numérique, le management de projet et les GroupWares.

Collaboration Profiles

Title:	CHRONOPOLYS, reinvents GroupWare
What we offer:	CHRONOPOLYS is an hosted solution dedicated to collectivities such as cities, regions, etc. CHRONOPOLYS allows to organise and simplify the project management within any structure through collaborative exchanges : coordination, knowledge management, planification, etc.

CHRONOPOLYS est solution hébergée au service des collectivités locales et

territoriales. CHRONOPOLYS sert à organiser ou simplifier la gestion des projets de la collectivité, c'est-à-dire les échanges entre ses agents internes et externes : la coordination, le partage d'information, la planification, etc.

Collaboration sought:

Commercial, Licence, Joint venture, R&D

What are we looking for

We are looking forward to establishing commercial partnerships to develop the product in terms of usage. Also techno partnerships, for exemple with financial or collaborative software, to extend our solution.

Nous recherchons des partenaires commerciaux et intégrateurs, pour développer l'usage de notre solution. Des partenaires technologiques, de solutions connexes (messagerie collaborative, gestion financière, etc.) pour étendre fonctionnellement notre solution.

Baphira

Street: Rue du Planois
City: 7090 Braine-le-Comte
Country: Belgium
Telephone:
Mobile: +32 485 74 98 18
First Name: Vincent
Last Name: Vandegans
Position: Gérant
E-Mail: vincent.vandegans@baphira.com

Description: Baphira is a Belgian e-business company, specialised in two areas of activity:

- E-commerce solutions: based on new technologies, we provide technical advices but also fonctionnal help on all e-commerce related domains.

- Intranet solutions to help small companies managing their Human Ressources through a full web-based application.

Collaboration Profiles

Title: E-commerce solutions

What we offer: We offer e-commerce solutions with the following "non-exhaustive list" of advantages:

- quickness of implementation
- respect of the standards (W3C, XHTML, CSS)
- 7 years of experience
- all inclusive (95% of the common requirements)
- E-learning
- Accessibility & easyness of use
- Evolution of the product (30% re-invest in R&D)
- ...

Collaboration sought: Commercial, R&D

What are we looking for We are of course looking for new prospects to implement our solutions, but we are also searching for partners to grow up through the European market.

Title: Intranet 2.0

What we offer: We have developed a full web-based ERP for the Human Resources Management

(HRM). The advantages of this solution is:

- Accessible from everywhere
- Managing the time of your employees
- Work together wherever you are (collaborative solution)
- Help managers to make right decisions
- Communication space for your company
- 3 years of HR experience, 7 years of Web experience
- Ergonomic, simple & accessible to everybody
- E-learning and courses to help your employees in learning the solution

Collaboration sought:

Commercial, Joint venture, R&D

What are we looking for

We are of course looking for new prospects to implement our solutions, but we are also searching for partners to grow up through the European market.

Bayern Innovativ GmbH - EU Co-operation Unit

Street: Gewerbemuseumsplatz 2
City: 90403 Nuremberg
Country: Germany
Telephone:
Mobile: 0160-7258973
First Name: Martina
Last Name: Schuhmacher
Position: Team and Project Assistant
E-Mail: schuhmacher@bayern-innovativ.de

Description: The EU-Co-operation Unit of the Bayern Innovativ GmbH (host organisation) is partner in the newly established Enterprise Europe Network. It is located in Nuremberg, Bavaria. Its mandate is to support cross-border technology transfer of SMEs and research institutes in Bavaria.
The EU-Co-operation Unit also enhances Bavarian companies and institutes in becoming partner of newly developed EU funded projects.
The following services are offered in detail:

- On-site visits and technology audits
- Mediation of technology partners via the European Technology Database
- Technology brokerage events
- Company missions
- Joint pavilions at high-tech fairs
- Support for participation in EU projects

Collaboration Profiles

Title: Transnational Technology Transfer
What we offer: The main target of the EU-Cooperation Office of Bayern Innovativ is supporting Bavarian SMEs and institutes in initiating technology partnerships within EU countries and the countries associated to the 7th Framework Programme by means of transnational technology transfer.

This target can be reached by several tools:

- Technology Database
- Brokerage Events

	- Company Missions - Joint pavilions at hightech fairs etc.
Collaboration sought:	Commercial
What are we looking for	We are looking for companies in the field of multimedia in order to bring them together with our Bavarian companies.

cap digital

Street:	5 bis rue d'Uzès
City:	75002 Paris
Country:	France
Telephone:	
Mobile:	0672807655
First Name:	Patrick
Last Name:	Cocquet
Position:	CEO
E-Mail:	patrick.cocquet@capdigital.com
Description:	Cap Digital, the French business cluster for digital content: creation, knowledge and communication

Established as a non-profit organization, its 350 members represent the digital industry's most active players in Knowledge Engineering, Digital Heritage, Audio-Visual & New Media, e-Education, Collaborative Technology & Intelligence (ICT), Digital Lifestyle & Services, and Video Games.

Its role as a cluster is to promote growth and innovation in Digital Content Creation and Knowledge Management industries for the greater Paris Region. Cap Digital provides members with key information, networks, and resources: ongoing competitive intelligence, training, partnerships, funding solutions, project reviews and a vital group energy.

This cluster, which currently has 320 members (80% of them innovative SMEs), has defined four priority aims:

- **Research & Development:** Cap Digital has certified 100 innovative projects which are already funded by more than 250 million Euro.
- **Management and networking:** By providing businesses in the cluster with a structure, support and a real sense of community, Cap Digital encourages the sharing of know-how and cross-fertilisation between the cluster's seven activity sectors.
- **Company development:** The cluster works with public- and private-sector funders to find the appropriate finance for its designated projects. With the help of manufacturers and researchers, it identifies the most buoyant markets and the major technological challenges of the future.
- **International deployment:** Cap Digital acts as an interface between companies based in Paris Region and the major European and global economic centres, with the goal of setting up international projects. It helps the region's manufacturers and research teams to become world leaders in their field.

Capgemini

Street: Tour Europa
City: 92927 La Défense
Country: France
Telephone:
Mobile: +33 673833983
First Name: Sylvain
Last Name: Quendez
Position: Business Development Manager - Innovation
E-Mail: sylvain.quendez@capgemini.com

Description: Capgemini:
- 83,000 people worldwide
- Values: Honesty, Boldness, Trust, Freedom, Solidarity, Modesty, Fun.
- Business model: service provider. Capgemini is not a software vendor or VAR.

The main activity of Capgemini Technology Services is system integration.

System integration is about gathering software from third-parties, then assembling, customizing, and integrating them into customers' systems.

Collaboration Profiles

Title: Looking for innovative software vendors and service operators
What we offer: Capgemini provides integration services. As our partner, you can be sure to offer a complete answer to your customers by integrating your product into their information system.

Additionally, offer business opportunities in the following fields:

- Security of enterprise data and documents
- Identity Management
- Media broadcast & content delivery
- Mobile applications and services

Collaboration sought: Commercial

What are we looking for As a Capgemini partner, you are:
- a Software Vendor or a Service Operator whose product requires system integration.

In order to initiate a partnership, we need an actual business opportunity. Capgemini holds business opportunities in the following fields:

- Security of enterprise data and documents
- Identity Management
- Media broadcast & content delivery
- Mobile applications and services

In other fields, we will ask you to bring the business opportunity.

Cluster TWIST

Street: Rue des Brasseurs, 175
City: 5000 Namur

Country: Belgium
Telephone:
Mobile: +32 496 244 390
First Name: Michel
Last Name: Colinet
Position: Executive Manager
E-Mail: michel@twist-cluster.be

Description: Technological excellence in text, image, and sound in the Walloon Region

1. Geographical location : Wallonia (Belgium)
2. Type of organisation : cluster
3. General information :

The aims of the Twist cluster are:

- to encourage and facilitate partnerships and synergism amongst the various parties in the cluster to boost enterprise development.
- to amplify and facilitate technological development and innovation in order to help create and develop new activities or products.
- to increase economic fall-out for Wallonia's businesses, especially for micro-enterprises and SMEs:

§ giving access to expertise and information in the areas of sound, image, and text;

§ increasing the public and specialised groups' awareness of the activities of the cluster and its members;

§ bolstering dialogue with public institutions and government (collective requests for the establishment of new aid, R&D, infrastructure, and training programmes, for example).

Collaboration Profiles

Title: Excellence in digital image, sound & text
What we offer: Access to a network of companies active in the same areas : digital technologies for text-sound- and image processing.

What are we looking for Contacts with other clusters active in the same fields of activities for partnership, matching,...

ClusterMedia Labs

Street: Campus Universitário de Santiago, Edf1
City: 3810-193 Aveiro
Country: Portugal
Telephone:
Mobile: +351934260149
First Name: Vitor
Last Name: Soares
Position: CEO
E-Mail: vitor.soares@clustermedialabs.com

Description: The nuclear technology of ClusterMedia Labs is based on the development of audio-visual recognition algorithms from the conjunction of two large scientific areas: digital processing of audio & video signals and machine learning. Content-based Analysis and Automatic Indexing Engine Based Tools for fast, low-cost and feasible treatment of huge collections. Real-Time Automatic Speaker Identification.

ClusterMedia Labs is located in Aveiro - Portugal.
[map] : <http://www.ua.pt/campus.asp>

The market(s) are essentially in:

- the audiovisual/broadcast industry ;
- suppliers of media/business intelligence monitoring services ;
- media asset management ;
- entities managing artists' rights ;
- biometric system and electronic security ;
- entertainment and mobile music services ;
- people with hearing problems and the visually impaired.

Collaboration Profiles

Title: Search Engine for AudioVisual Material (based on Content-Based Analysis)
What we offer: WebService that incorporates Automated Media Analysis for content-based and semantic indexing.

ClusterMedia Labs has developed advanced algorithms to automatically generate metadata from Live Broadcast 'Feeds', and publish online digital media content searchable in the following categories:

- Speakers
- Program codes
- Commercials
- Jingles
- Singers
- Keywords
- Musical Genres

The automatic real-time recognition of people and events in video footage is achieved by semantic audio analysis.

Search Engine based on signal processing / analysis, aim at maximizing the automation and innovation of various critical processes, such as the identification, selective content search and retrieval, organization, sharing and intelligent treatment of audiovisual material

Collaboration sought: Licence, Eureka EContec, FP7
What are we looking for - partnerships

Title: LiveMeans .: AudioVisual Content-Based Indexing and Retrieval
What we offer: Applications:

In the content industry the descriptive metadata production of audiovisual material is

traditionally intensive labour-based. This manual process is naturally slow, expensive and does not have sufficient reliability.

Are you needing to:

- extract specific and important information automatically, quickly and accurately.
- generate critical content descriptions and establishing real reuse.
- search inside huge assets collections in a fast, low cost and feasible manner.
- provide innovative services delivering real-time business intelligence .

LiveMeans is an adaptable platform that may be fitted to the desired application in the following sectors:

- LiveMeans 'Media Asset Management / TV&Radio Broadcast' (B2B)
- LiveMeans 'Monitoring/Clipping' (B2B)
- LiveMeans 'Parliaments' (B2B)

Benefits for European/ National Parliaments information workflow:

Automatic Recognition Technology incorporated in LiveMeans Platform (powered by ClusterMedia Labs), allows the European & National Parliaments significantly increase the speed and productivity in audiovisual material search and retrieval, for fast, low-cost and feasible treatment of huge collections / archives of AudioVisual material.

- LiveMeans 'Intelligent on-air switcher on Mobile TV services'
 - LiveMeans 'Music-Radio' (B2C)
- Eureka EContec, Eurostars, FP7

Collaboration sought:

Collaboration sought:
What are we looking for

Detecting useful sound as a support to people who have hearing disabilities
Audio-visual automatic recognition algorithms.
FP7, Eurostars, Eureka EContec
companies developing technology for people who have hearing disabilities

Title:
What we offer:

Real-Time Automatic Speaker Recognition
ClusterMedia Labs has developed advanced algorithms to automatically generate metadata from Live Broadcast 'Feeds', and publish online digital media content searchable in the following categories:

- Speakers
- Program codes
- Commercials
- Jingles
- Singers
- Keywords

- Musical Genres

The automatic real-time recognition of people and events in video footage is achieved by semantic audio analysis.

Collaboration sought: Eureka EContec, Eurostars, FP7

What are we looking for - partnerships

Title: Content-Based Music Discovery & Retrieval Engine

What we offer: This Engine allows user to easily find (drag & search) through acoustic similarities songs and/or artists with recently material releases (novelty & relevance) .

It improves current discovery & search tools in music recommendation services and mitigates obstacles related to scalability, "cold-start" and one-sized selections.

Collaboration sought: Eureka EContec, Eurostars, FP7

What are we looking for - music services providers

Title: Partner for European Projects in Semantic AudioVisual Search & Retrieval

What we offer: Audio-visual recognition algorithms from the conjunction of two large scientific areas: digital processing of audio & video signals and machine learning. Content-based Analysis and Automatic Indexing Engine Based Tools.

Advanced algorithms to automatically generate metadata from Live Broadcast 'Feeds', and publish online digital media content searchable in the following categories:

- Speakers
- Program codes
- Commercials
- Jingles
- Singers
- Keywords
- Musical Genres

Collaboration sought: FP7

What are we looking for Partner for European Projects in Semantic Search

Culminatum Ltd Oy, Finnish Digibusiness Cluster

Street: Radiokatu 5 D

City: 00240 Helsinki

Country: Finland

Telephone:

Mobile: +358 40 5722 393

First Name: Irina

Last Name: Blomqvist

Position: Business Director

E-Mail: irina.blomqvist@culminatum.fi

Description: Finnish Digibusiness Cluster is the national contact point for digital content business in Finland.

Digibusiness Cluster concentrates on the business development of content business companies by offering high-quality services regarding internationalisation and growth coaching to the companies.

Collaboration Profiles

Title: Finnish Digibusiness - Digital Content Cluster

Collaboration sought: R&D, Eureka EContec
What are we looking for Business development organisations.

CWI

Street: Kruislaan 413
City: 1098SJ Amsterdam
Country: Netherlands
Telephone:
Mobile: +31653849178
First Name: Martin
Last Name: Kersten
Position: head of department
E-Mail: martin.Kersten@cw.nl

Description: CWI's mission is twofold: to perform frontier research in mathematics and computer science, and to transfer new knowledge in these fields to society in general and trade and industry in particular.

CWI's mission is realized by several means. In addition to the standard ways of disseminating scientific knowledge, for example through publications, presentations at conferences, organization of workshops and exchange of researchers, CWI actively pursues joint projects with external partners, provides consulting services and actively stimulates the creation of spin-off companies.

A technology transfer event is organized annually to promote this side of CWI's activities.

Also

special efforts are made to make research results known to non-specialist circles, ranging from

researchers in other disciplines to the public at large. CWI has many contacts with national

organizations for applied research with wide experience in turning research results directly into

practical applications. Its researchers are supported by state-of-the-art computing facilities and a library of national importance.

Collaboration Profiles

Title: Multimedia Database and Search Technology
What we offer: The mission of MultimediaN is to develop and absorb knowledge of multimedia technology, for the information-intensive and competitive knowledge-society of the future. To accomplish this, MultimediaN puts the participation of high-science, high-tech, and highly involved partners first.

MultimediaN opts for high-science, because only high-quality research will survive within the worldwide competition of ideas. The interlocutors will mostly be high-tech - big or small - because they articulate advanced questions and are able to absorb high-quality solutions.

The combination of high-science and high-tech offers the necessary condition for the realization of a short development time and a short time distance to the market. Under this condition the competition can be met worldwide.

See for more details <http://www.multimedian.nl/>
FP7, R&D

**Collaboration
sought:**

**What are we
looking for** Companies interested in state-of-the-art multimedia analysis, data management, and application.

Project partners to further develop multimedia search technology.

DAVI interactive

Street: 19 rue Godefroy
City: 92800 Puteaux
Country: France
Telephone:
Mobile: +33607391907
First Name: pascal
Last Name: Arbault
Position: managing director
E-Mail: pascal@my-davi.com

Description: Created in 2000, DAVI interactive is located in the Paris area, France. It is specialized in animation and communication media with hyperealistic interactive 3D actors and objects.

As software editor, designer, integrator and services supplier, DAVI interactive focuses on significant and continuous RTD development to enhance and bring new products on the market. .

Collaboration Profiles

Title: Business development
What we offer: Providing a constant RTD effort in animation and communication media with hyperealistic interactive 3D actors and objects, Davi Interactive is acting as a software editor (Flash Actor TM), integrator, and service supplier. Thanks to FlashActor/ActingActor proprietary technologies and 3D registered natural language bot solutions (vocal synthesis and recognition), DAVI Interactive is the first to offer full service of multiplatform help and support, ranging from welcoming, Internet/intranet support (virtual advisor, virtual hot line technician), communication (entertainment, advertisement),and training (e-learning, virtual coach). This technology provides now a real time interactive MMI

**Collaboration
sought:** Commercial, Joint venture, R&D

**What are we
looking for** Identify at least one partner and/ or distributor able to integrate Davi Interactive's graphic solutions into its commercial offer. Ideal profile could be an editor-integrator having a marketing & communication approach and /or a marketing /communication agency.

dreamshake

Street: 1 rue Fénelon
City: 75010 Paris
Country: France
Telephone:
Mobile: +33 6 60 80 79 83
First Name: Dubois
Last Name: Arnaud
Position: co-founder
E-Mail: arnaud.dubois@dreamshake.com

Description: Dreamshake is located in Paris and is an online social network. Dreamshake.com is internet's first community web site for dreamers. A veritable network of initiatives, sharing and collaborative exchanges under the mandate of Web 2.0, this common platform will allow project providers and seekers (individuals, associations...) to connect and share their ideas, experiences and skills with the intent of inciting, facilitating and achieving the dreams of each user.

Collaboration Profiles

Title: Commercial partnership - media visibility - targeted content
What we offer: Dreamshake can offer a better, more targeted communication service via advertising slots on Dreamshake.com's social network:

- o Mass communication designed specifically for each dream category (ex. Business support for dreamer-adventurers/entrepreneurs)
- o Communication targeting individual dreamers according to their profiles, projects and needs

Collaboration sought: Commercial
What are we looking for

- Technical partners who can share new technologies on social networks, web2.0
- Technical partners with good knowledge of Architecture/hosting
- Partners (communication, marketing, deployment) for launching Dreamshake.com in other languages. Today, Dreamshake.com is only available in French but we aim at an English version soon followed by other languages.

eBusiness Lab

Street:	Nea Ktiria
City:	30200 Messolongi
Country:	Greece
Telephone:	
Mobile:	00306932349994
First Name:	Spiros
Last Name:	Sirmakessis
Position:	Director
E-Mail:	syrma@teimes.gr

Description: The department aims at providing students with extended knowledge and skills necessary to develop and apply Information and Communication Technology in the fields of Management and Finance. Its curricula provides students with practical experience in available technologies and knowledge of future developments in this rapidly changing area.

The thematic areas of e-Business Lab at the Technological Educational Institute of Messolongi include, but are not limited to:

-Internet Technologies: research on new technological aspects, filtering techniques and search algorithms.

-Multimedia Technologies: research and development of storage and information manipulation methods in secondary memory. Emphasis is given to new algorithms and techniques to anticipate the specific requirements of storing multimedia objects.

- E-business: theoretical models of e-commerce systems, efficiency, data security and transactions, business models.

-Web Mining: Information and knowledge mining on the web, automatic categorization of documents, web usage modeling.

-Adaptive Systems: Research and development in personalization and customization techniques.

-Edutainment: design of educational scenarios, design and implementation of educational games, customization of commercial videogames for educational purposes.

-Data Structures: Research on advanced data structures, algorithmic complexity.

-Modeling and Analysis of Computer Systems' efficiency.

-Human Computer Interaction: user behavior study in interactive systems, interaction evaluation, usability.

Furthermore, eBusiness Lab is also active in conducting basic research in the thematic areas of data and advanced data structures, distributed systems, modelling and analysis of computer systems, artificial intelligence, expert systems and geographical information systems.

The scientific work of the lab is constantly presented internationally via its publications in scientific journals and international and national conferences in its research areas.

Collaboration Profiles

Title: eBusiness

What we offer: The eBusiness Lab is focusing on all aspects of information technology in the new economy. The lab provides technical solutions for the e-economy and e-society and consultancy services to public, governmental and private organisations at regional and national level. Areas of expertise include, but are not limited to:

- e-business
- e-learning
- e-government
- e-consulting
- e-participation

Over the last years, eBusiness Lab implemented and participated in more than 25 projects, competitive or not, in its research areas, such as: distance learning applications, telecommunication systems, integrated application of electronic commerce and teleworking, development of educational multimedia software applications, multimedia authoring systems and multimedia internet applications.

The Lab provides the Hellenic Ministry of Economy with services as online services developer. These services include e. g. development of online questionnaires or mining applications in huge amounts of datasets.

Collaboration sought: Commercial, Eureka EContec, FP7, R&D

What are we looking for We are looking for new projects and new collaborations in the area of our expertise. We offer development manpower in a reliable environment.

Ecole Central Paris - Applied Mathematics and Systems

Laboratory

Street: 41, rue Pajol

Description: Hellenic Project for Wider Application of R&D (ΠΡΑΞΗ in Greek) was created to provide bridge between Research and Industry in Greece. Since 1991 HELP-FORWARD offers Technology Transfer brokerage services to Greek companies and Research Institutions and provides information, mediation and advisory services to all stages of Technology Transfer and Exploitation of Research Results:
funding opportunities identification,
detection of technological needs,
technology watch and evaluation,
partner search
technology transfer negotiations support.

Collaboration Profiles

Title:	A new Internet server and gateway solution embedded in a box
What we offer:	<p>The innovative server is an easy-to-use and affordable Internet server and gateway solution embedded in a box. It provides core services (Web, mail with anti-virus and anti-spam protection, file server, Lightweight Directory Access Protocol - LDAP), simplified network management (firewall, Domain Name Server (DNS), Virtual Private Networks (VPN), proxy servers), system management (User & Group management, automated backups) and classical telephony applications (fax).</p> <p>Based on well-known and tested-in-time Open Source servers it provides a simplified Web interface that helps to set up and manage in a centralised way everything a user needs in terms of network integration and telephony, without the need of employing specialised IT personnel.</p> <p>The server comes with two network interfaces. One is connected to the DSL modem that provides connectivity with the Internet, and the other is connected to the LAN.</p>
Collaboration sought:	Licence, FP7, R&D
What are we looking for	<p>Type of partner sought: Companies, consultancy firms and SMEs.</p> <p>- Specific area of activity of the partner: Hardware software vendors, IT consultants to SMEs and SMEs searching for cheaper and easy solutions.</p> <p>- Task to be performed: * Hardware software vendors, IT consultants to SMEs: Offer the technology to their clientele with the technical consultancy of the Greek Technology provider. * SMEs: Adopt the technology directly with the technical consultancy of the Greek technology provider.</p>

Title:	A new platform for content adaptation and multimedia streaming delivery to mobile devices based on t
What we offer:	<p>Content streaming and downloading delivery have become significant revenue generators for mobile service providers around the world. A Greek high-tech SME has developed a mobile technology platform around content adaptation and multimedia-streaming delivery to mobile devices based on the pervasive 3rd-Generation (3G) standards. By utilising all rich media adaptation, transcoding, optimisation, provisioning and security into a single, centrally managed, modular, comprehensive solution, the platform takes full responsibility of content, ensuring it arrives quickly, safely and with the best user experience.</p>
Collaboration sought:	Commercial, Licence, FP7, R&D
What are we looking for	<p>Type of partner sought: Companies providing mobile communications and multimedia services.</p> <p>- Specific area of activity of the partner: a) Mobile operators. b) Content providers.</p> <p>- Task to be performed:</p>

Provide the offered platform and applications to their clientele through licensing (and commercial) agreements with the technical consultancy of the Greek technology provider.

Title:	Collaboration with the Incubator for Creative Industries, Crete
What we offer:	The incubator for creative industries is a pilot project in the area of Crete, Greece. It provides services to the 13 categories of creative industries in Crete. Collaborations with other clusters and incubators are sought.
Collaboration sought:	Commercial, FP7
What are we looking for	Incubators and clusters in the creative industries

IBBT - Interdisciplinary Institute for BroadBand Technology

Street: Gaston Crommenlaan 8 bus 102
City: 9050 Gent
Country: Belgium
Telephone:
Mobile: +32473110154
First Name: Olivier
Last Name: De Cock
Position: manager technology transfer
E-Mail: olivier.DC@ibbt.be
Description: Stimulating ICT innovation

IBBT is an independent research institute founded by the Flemish government to stimulate ICT innovation. The IBBT team offers companies and organizations active support in research and development. It brings together companies, authorities, and non-profit organizations to join forces on research projects. Both technical and non-technical issues are addressed within each of these projects.

Mission

IBBT training provides highly competent specialists in different aspects of the broadband technology. Besides this, it carries out multi-disciplinary research for the Flemish business community and the Flemish government. This includes all technological, legal and social dimensions of the development and exploitation of broadband services.

The Flemish government invests in multi-disciplinary broadband research. The objective: To make Flanders a leading and internationally recognized player, in the information society of the future.

The IBBT organization

- * The central staff of IBBT consists of 18 fulltime employees. They are responsible for operational support and external communication.

- * IBBT has an extended network of +150 partners. Some of these partners are actively involved in determining the long-term vision and strategy of IBBT.

- * IBBT unites more than 750 researchers from numerous Flemish universities and knowledge centers. Each research group is specialized in one or more of the basic competencies of IBBT. The composition of the research groups is flexible and aligned to the evolving needs of companies and organizations.

- * The Board of Directors is made up of representatives from both the private and public sector. The 16 members ensure that all research programs meet existing needs.

The IBBT research domains

IBBT stimulates research that addresses current social and economic issues.

- * eHealth: ICT applications for the healthcare sector
- * New Media: exploring the possibilities of new communication media
- * Mobility & Logistics: research into ICT applications that enhance the mobility of people and goods
- * Enabling technologies: basic research into ICT support for a wide range of applications
- * eGovernment: ICT applications for public authorities

Collaboration Profiles

Title: Beyond MAGNET Beyond - User-centric Networks of the Future
What we offer: IBBT is through IMEC partner in the 16 million FP6-project MAGNET Beyond -"My personal Adaptive Global NET and Beyond", dealing with user-centricity, personalization and personal networking. The project is just ending.

MAGNET Beyond wants to improve the quality of life for the user by introducing new technologies that make environments smarter, more responsive and more adapted to the needs of the user, without jeopardizing privacy and security of the individual. With both operators and manufacturers in the consortium research ideas could be quickly implemented, offering the ideal ecosystem that is also proper to IBBT.

From this research IBBT has selected one idea for further development in our iBootCamp, launched 1 April 2008. The strength of IBBT is that it offers a fertile breeding ground for young researchers to stay at the cutting edge of their technology and the means to develop these further into possible ventures. Eurodigimeet is an excellent opportunity to present t

Collaboration sought: R&D, FP7, Joint venture

What are we looking for Make IBBT known to other international clusters and partners. Seek international opportunities for our ventures.

INFOPOLE Cluster TIC

Street: rue du Séminaire 22
City: 5000 Namur
Country: Belgium
Telephone:
Mobile: 32-497459166
First Name: Michel
Last Name: BLACK
Position: Project Manager
E-Mail: michel.black@infopole.be

Description: INFOPOLE Cluster TIC is, like already indicated in the name, a cluster organisation. Accordingly, its objective is to combine industrial and academic competences to create a pole of excellence in the ICT sector and to promote business and innovation through partnership.

Through this mobilisation of competences, INFOPOLE Cluster TIC aims at enhancing

regional expertises and at strengthening their position on the local, regional, national and international level.

To contribute to the shortage of skills, improving the visibility of the sector and its attractiveness, pushing its dynamic and its development, capitalizing the expertise resulting from research and opening the doors for international development are further ambitions of INFOPOLE Cluster TIC.

Collaboration Profiles

Title:	Promoting business and innovation through partnership
What we offer:	INFOPOLE Cluster TIC aims at mobilising a significant number of actors in the field of ICT: very small & small-to-medium-sized businesses, large corporations, University laboratories, research centres, training centres, administrations,... - to offer value-added services particularly with regard to start-ups and joint venture consultancy, with the accent on member participation in the tendering process for offers and projects linked to the ICT sector at regional, federal and European levels - to draw up a cooperation framework for network members, covering commercial, technical and R&D aspects - to start up and/or accompany partnership projects between members or with external actors, which highlight the expertise available, while reinforcing the international profile of Wallonian competence in information and communication systems
Collaboration sought:	R&D, FP7, Eurostars, Eureka EContec, Joint venture, Manufacturing, Licence, Commercial
What are we looking for	Besides contact with other clusters, we are open to contacts with enterprises looking for commercial / technical partnership with Walloon / Belgian enterprises.

Collaboration sought: Commercial, Joint venture, Eureka EContec, Eurostars, R&D
What are we looking for We are looking for content aggregators on business profiles in ICT and digital content sectors.

Institut TELECOM

Street: 46 rue Barrault
City: 75013 Paris
Country: France
Telephone:
Mobile: +336 07 13 28 02
First Name: Pierre
Last Name: Simay
Position: Coordinator for international affairs
E-Mail: pierre.simay@institut-telecom.fr

Description: INSTITUT TELECOM is made up of "Grandes Ecoles" (prestigious French higher education establishments) in the field of information and communication science and technology (ICT): Telecom ParisTech, Telecom Management&SudParis, Telecom Bretagne, along with two establishments created in partnership with universities and businesses: Télécom Lille 1 and the Institut EURECOM. INSTITUT TELECOM is under the authority of the French Ministry of Industry. Its mission is to provide training programs and to conduct research in ICT. INSTITUT TELECOM's mission is also to contribute to the industrial development of ICT through the utilization of science and technology and development research carried out in close collaboration with industry. It interacts very closely with the world of business, through research contracts and life-long learning programs, and through its consulting, standardization and business start-up support activities. INSTITUT TELECOM features around 600 teaching and research staff and a number of 4500 students, including 700 doctoral students. A total of 50 nationalities are represented within the INSTITUT TELECOM. Its research teams cover a broad spectrum of disciplines, ranging from fundamental technologies, information processing, networks, computing and software to the economic, social, and legal aspects, industrial strategies and new services and usages. This expertise allows research programs to be conducted in the fields of mobile, satellite and optical communications, access networks, multimedia, business communications and the Internet. The INSTITUT TELECOM is highly involved in the European Framework Programme (FP). It has participated in more than 40 FP6/IST projects.

Collaboration Profiles

Title: R&D in ICT
What we offer: Expertises in ICT for R&D projects:
High-speed infrastructure networks, Mobile communication networks, Multimedia, Web technologies and Information Systems, Uses studies in Information society.
We aim at participating in National projects, European projects (FP7, Eureka, AAL, ...)

Collaboration sought: R&D, FP7, Eurostars, Eureka EContec
What are we looking for Industry, SME, Academic partners for ICT R&D projects

INTERNET KIOSK S.L.

Street: c/ Isabel Colbrand 10, nave 48
City: 28050 Madrid
Country: Spain
Telephone:
Mobile: 00 34 670 594 940
First Name: Pedro
Last Name: Rodriguez-Inciarte
Position: General Manager
E-Mail: direccion@internetkioskos.com
Description: Internet Kiosk S.L. is in Madrid, Spain.

Internet Kioskos (IK) is a Spanish corporate Capital created in January 2001 by highly experienced professionals from the multimedia and hardware industries.

In IK, we manufacture a wide range of highly personalized, tailored-made Multimedia Kiosks, designed to meet our clients' requirements.

The process is carried out by working closely with the client to provide the best solutions, develop the most attractive design, reliability and functionality by using top quality manufacturing components.□

IK will offer you:

Public information desk

To replace or improve the information desk, indicative panels, leaflets, local information without managing costs.

Products and services catalogue

Allows the presentation of your products and services with the ability to incorporate graphic and multimedia elements.

Data collector

Entry point that includes selective parameters of information, optimizing the results focusing on client's objectives.

Publicity Tool

Allows the creation of interactive publicity in any image, audio and video format.

Ticketing terminals

Automatic prepaid systems for show tickets, telephone and photograph services.

Collaboration Profiles

Title: Internet Kiosk Pro
What we offer: We are specialised on multimedia kiosks, ticketing solutions and digital signage. Our long experience and competitive prices are two of our several advantages.

We have 14 models of kiosks and we also offer tailored solutions: we produce what the client needs as we have a big warehouse with the most recent technologies and our technicians have been in the technological market for more than 10 years.

We have various systems which make our products unique: the watch dog timer, the "breathing" systems of our plates that avoid the warm-up of each terminal. Our software is very simple and easy to install and the maintenance is also very easy. We always offer one year warranty.

Our kiosks can be used anywhere a client needs it to. At private or public companies, internal or external. We have already provided terminals to many different sectors: food&service, banks, petrol stations, shopping centers, city councils, human resources companies, entertainment, etc.

Collaboration sought:

Joint venture, Manufacturing, Licence, Commercial

What are we looking for

Internet Kiosk Pro is interested in sourcing agents for our products throughout Europe.

The agents would need to sell our products, install them and oversee the perfect functioning of them.

The most interesting profile of this agent would be familiar with the technological sector, with high communication skills willing to introduce our products in France, Portugal, England, Germany... It would be necessary that these agents would know different companies of different sectors that are willing to reduce costs and increase the benefits.

Another option would be to meet software distributors who would be interested on introducing our hardware adding the software they have.

Though our products are technological, our target companies / business do not necessarily have to be so.

Our experience in Spain has shown us that: if you have a business, a proper kiosk is an advantage.

ISTHMA

Street: 18, rue Soleillet

City: 75020 Paris

Country: France

Telephone:

Mobile: +33 610 166 645

First Name: Frederick

Last Name: VAUTRAIN

Position: CEO

E-Mail: vautrain@isthma.fr

Description: ISTHMA is a 5 year-old, 10 people software company based in Paris (France) and operating throughout Europe.

Collaboration Profiles

Title: Complex data analysis solutions

What we offer: In consulting :
Methodological support in complex problem of information analysis
Consulting for supply and mix otpimisation, CRM, geomarketing and Panel analysis

In software
Tools for information visualisation and transmission of large sets of data by using graphical tables
Tools for complex information analysis as clustering, forecasting...

Collaboration sought: R&D, FP7, Commercial

What are we looking for Business and technical partnership in Business Intelligence

iViFlo

Street: 6 Allée des Trois Pins
City: 93390 Clichy sous Bois
Country: France
Telephone:
Mobile: +33623084573
First Name: Luc
Last Name: Podrzycki
Position: Co founder
E-Mail: luc@iviflo.com

Description: iViFlo, a French start-up founded by 2 experts of multimedia services, is an editor and operator of interactive concepts for mass media in a multisupport environment (Mobile, Radio, Web, TV, Press...)

iViFlo has taken a central position in the convergence market.
Our principal targets are the media, brands and telecommunications (OpCo and Web2.0) actors.

We have been awarded for our innovation with the best innovation prize by Fondation de France - GET/Louis Le Prince Ringuet.

The main operational experiences we've developed for our customers are :

- interactive TV programs based on mobile video messages for a great European media group
- interactive Radio programs based on a multimedia Web 2.0 site and multimedia mobile messages
- interactive marketing programs for a leader brand using Web 2.0 and mobile technologies

Collaboration Profiles

Title: Interactive media concepts

What we offer: We develop interactive video services, mobile centric, with continuity over all supports

(TV, Web, ADSL Box...). iViFlo is providing personalized interactive content on any device.

For our customers, we design new interactive concepts, propose consultancy around the business model and guarantee the highest level of quality in deployment and the hosting of our technical solutions.

Our solutions follow the explosion of the blog phenomenon and the use of video media, meaning new needs and new consuming patterns.

Our strength is based on technical and business partnerships with market and institutional leaders such as HP, Telindus and INT Telecom school.

Collaboration sought:

Commercial, R&D

What are we looking for

iViFlo is looking for a partnership with:

- mass media actors (TV, Radio, Web, TV, Press...)
- international resellers
- the multimedia industry (music, movies)
- Internet & mobile operators
- advertising companies.

Janela Digital, S.A.

Street: Rua Mnauel Matos e Sousa, 76

City: 2500-283 Caldas da Rainha

Country: Portugal

Telephone:

Mobile: + 351 91 190 6153

First Name: Aidan

Last Name: Hughes

Position: International Director

E-Mail: international@janeladigital.com

Description: We are the leading Real Estate Solutions Provider (ERP/CRM software along with internet solutions) in both Spain and Portugal and have decided to target the international market also. We are looking for resellers from several countries. We are offering full training, support, product information and much more to enable upcoming businesses and entrepreneurs the opportunity to thrive in a continuously growing market. We provide software that offers a total management solution integrated with internet advertising to enable real estate businesses to be seen by all, thereby generating more business for them.

We excel in research and development and have been complemented on our technologies and solutions for years through various awards.

Collaboration Profiles

Title: Partnership search for Real Estate Management Software

What we offer: With close to 10 years in the real estate solutions industry, we have created the first "hands on" application directly for the real estate industry. Utilising the power of the internet and the ease of use of our management solution, we have given real estate agents the ability to transform their agency into a truly international company. To target the market is the most important thing for a real estate agency in these days, and we have brought together some of the world's most exciting technologies to make agencies stand out from the rest of the competition and give them a professional and creative edge

that can push their business forward and capture the leads that they need.

By combining some of the latest technologies with our solution we have been able to present a unique opportunity for agents to stand out from the crowd. Touchscreen technology, Mobile real estate software and the ability to transform a real estate agent into a "one stop shop" were all material can be

Collaboration sought:

Commercial

What are we looking for

We are looking for companies who want to grow and expand into different sectors and who have the ability to one day turn our solution into their main source of income.

We are particularly looking for IT, real estate professionals and entrepreneurs!

We offer a full representation arrangement by supporting the representative in all ways possible that we can. We design the webpages, host them, support page changes, provide the software and look after the 2nd line support. All we ask of the representative is that they look after 1st line support and help with the installation of the solution. This is also a 60-40 revenue share agreement so the representative will receive 60% of the overall revenue attained of whatever price they choose to sell the solutions at.

Kazago Online

Street: 14 impasse Mousset
City: 75012 Paris
Country: France
Telephone:
Mobile: +33607043606
First Name: Ethan
Last Name: Beardsley
Position: President
E-Mail: ethanbeardsley@kayenta.com

Description: Kazago Online is located in Paris. It is part of the Kayenta Group, a production company, with substantial experience in producing TV and online content for the kids market.

Kazago Online was created in 2008 to finance, market and distribute a virtual world targeting European kids 8-14 which will be launched mid 2009.

The virtual world is being developed by Yamago, a game developer specialized in creating online casual games for the kids market.

Collaboration Profiles

Title: Online virtual world for kids 8-14
What we offer: Opportunity to participate in the launch of a highly original virtual world produced by a leading Flash game developer
Collaboration sought: Commercial
What are we looking for
- Financing partners
- Technology partners
- European distribution partners

Kipak

Street: c/o Essec Ventures Av. Bernard Hirsch
City: 95021 Cergy-Pontoise
Country: France
Telephone:
Mobile: +33 6 23 74 33 30
First Name: Hugo
Last Name: Salaun
Position: CEO
E-Mail: hugo.salaun@kipak.com

Description: MOBILE - LOYALTY - RETAILERS
We propose to retailers the next generation of loyalty programs: targeted, personalised and paper free! Our solution is based on a technology that is able to securely read, validate and redeem a coupon sent on a mobile phone.

Collaboration Profiles

Title: Loyalty Programs on mobile phones for the Retail Industry
What we offer: Kipak has developed a technology that is able to securely read, validate and redeem a coupon sent on a mobile phone. The key advantage of our solution is that it is compliant with 100% of cash registers and has no impact on the retailer's IT system. Furthermore our technology works with existing mobile phones and future NFC phones.
Collaboration sought: Commercial, Manufacturing
What are we looking for: We are looking for 4 types of partners:
- Resellers who know their local market well and have a deep experience in selling CRM solutions to retailers.
- Integrators that can take charge of deployment and on-site maintenance.
- Relevant mobile technologies (such as Bluetooth, barcode scanning, ...) that can be mixed with our solution to propose a complete and seamless solution to the retailers.
- Investors

Kouvola Region Expertise Centre

Street: Vartiote 4
City: 45100 Kouvola
Country: Finland
Telephone:
Mobile: +358 400 931 181
First Name: Anne
Last Name: Piccolo
Position: Project Manager
E-Mail: anne.piccolo@kouvola.fi

Description: The Kouvola Region Expertise Centre, a branch of the KRFM Regional Business Development Department in Southeast of Finland, is a unit specializing in project development and management plus functioning as a coordinator of networks of research institutions, public bodies and enterprises. The KREC is the main driver of public-private-research in the region in a great number of regional, inter-regional and also European trans-regional RTD, innovation and training projects and networks as well as

within business and project cooperation with Russia.

The KREC is a member of the Finnish national competence cluster “Digital Contents” – a new holistic tool of business development with an ambitious task of national development of its' sector “Multilingual Communication and Content Management”. The KREC has a strong aim to systematically develop the competence area of European cooperation in accordance with selected focus points of the regional business development strategy, generally, and especially in the framework of the Digi-Business competence cluster.

Towards the Modern Language Industries:

The specific competence area covers the business development of “Multilingual Communication and Content Management” largely combining the respective company and research networks and the issues of content production with technology and content management. The development area covers the complete value chain: research, technology, product development, education and training, production, marketing and merchandising, support services. A specific R&D unit is to be established to support the holistic development of the language industries. The main objective of the KREC is to foster the business development in line with the Digi-business cluster's overall vision: Turning the expertise into world-class product and service businesses.

Collaboration Profiles

Title:	Multilingual Communication and Digital Content
What we offer:	The participant's goal is to find networking/business partners for future project collaboration in the field of modern language industry and digital content management. Within the regional business development (support for SMEs) the participant aims at moving from the triple-helix model to the quadruple helix thinking, as the content issues will more and more invite also the end user into an active role at piloting, testing and product design. In the new contexts the IPR, earning logistics and standards will gain more importance. From the point of view of the end users, i.e. client enterprises, one of the main objectives is to develop their knowledge and operational skills to improve their ability to communicate and interact in multilingual and –cultural situations and environments, and subsequently, to improve their competitiveness in the markets they are in or have intention to enter.
Collaboration sought:	Commercial, Eureka EContec, Eurostars, FP7, R&D
What are we looking for	Partners willing to develop a technology/content project in the field of multilingual communication, digital content and content management; research, public sector to foster the development, SME -partners to join the project planning and/or to mediate between local businesses

LEA

Street:	2 place des Vosges
City:	92051 PARIS LA DEFENSE
Country:	France
Telephone:	
Mobile:	+33 6 25 95 04 52
First Name:	Emmanuel
Last Name:	VIGOT
Position:	European Sales Manager
E-Mail:	emmanuel.vigot@leacom.fr

Description: LEA is a leader in Broadband Access, Home Networking and IPTV. LEA develops solutions for Service Providers and Integrators, like:

- STB,
- Powerline Communications,
- xDSL Filters,

for Access to, and In-Home Distribution of:

- Internet,
- Telephony over IP
- IPTV.

Affiliated to HF Company (Eurolist group B, small 90), LEA has set up the only Digital Home Interoperability Lab in Europe, officially recognised by the DSL Forum and by the HomePlug Alliance.

Established in 1999, LEA is headquartered in Paris France, and has offices in Belgium, the U.K., North America and Asia.

Collaboration Profiles

Title:	Remote Management of PLC devices
What we offer:	In the context of a booming Home Networking market, Customer Support is becoming tricky for Service Providers.

LEA, being a specialist in the reliable Powerline Home Networking Technology, is looking for a partner that would help offering the ISPs with a Software stack that would ease the remote management of the customers' Home Networks by the ISPs.

This software stack would be made available to both DSL based Access networks (TR069 on DSL modems) or Cable based networks (SNMP on DOCSIS modems).

This work is totally framed with Standards, DSL Forum and HomePlug PowerLine Alliance.

Collaboration sought:

R&D, Commercial

What are we looking for

The partners can be modem makers, ACS suppliers, modem software vendors, Telcos/ISPs, etc. Anybody interested in offering an enhanced service to more connected consumers.

LEA is bringing its in-depth knowledge of Powerline and HomePlug AV standard, plus Test-lab facilities (unchallenged !).

Lemon Way

Street: 104 Avenue de la Résistance

City: 93102 Paris

Country: France

Telephone:

Mobile: +33 6 69 59 85 58

First Name: Sebastien

Last Name: Burlet

Position: CEO

E-Mail: sburlet@lemonway.fr

Description: Lemon Way is a independant software vendor localized in Paris, that focuses on innovative multichannel software for banks and financial institutions. Our leading software suite Wonderbank provides secured transactional mobile banking capabilities to any bank.

We also provide B2B Mobile Asset Management solutions with real time analysis and charting on any mobile phone.

Collaboration Profiles

Title: WONDERBANK Mobile Banking and Mobile Trading

What we offer: Wonderbank software suite provides Mobile Banking and Mobile Trading capability to any bank or financial institution. It works on any cellular phone.

Area of expertise : mobile embedded software compatible on any handset : J2ME, WME, Google Android, Apple iPhone.

Know-how : Highly secured and easy to plug to existing banking SOA architecture.

We are working on authentication and security; SMS gateways and SMS Payment, TAG Payment, and NFC Payment.

Our technology can be used for Mobile banking, mobile trading, or Mobile Asset Management in the EMEA Market.

Collaboration sought: First customers in France are very satisfied with the innovative solutions we provide. Commercial, Licence, Joint venture, Eureka EContec, Eurostars, FP7, R&D

What are we looking for: We are looking for distributors in Luxembourg, Germany, Switzerland, Spain and Italy. We are looking for technical cooperation with a lab in Greece, Ireland or Central Europe, on security and authentication technical issues. With PF7 Budgets (proposal to be ready in November 2008).

Lex Persona

Street: Technopole de l'Aube - BP 601
City: 10901 TROYES Cedex 9
Country: France
Telephone:
Mobile: +33672743553
First Name: Francois
Last Name: Devoret
Position: General Manager
E-Mail: fdevoret@lex-persona.com

Description: Lex Persona offers software solutions in the field of creation and verification of digital evidence documents:

- independant of user environments;
- adjustable to organizational processes and signature policies;
- built on open standards to guarantee security and persistence;
- easy to integrate into existing applications.

With an experienced team of engineers, expert in security and digital signature software development, Lex Persona solutions address your needs for electronic document certification such as diplomas, student records, integrity and authentication of any digital content such as pictures, videos, games, scanned images, etc.

Collaboration Profiles

Title: Electronic signature and certification of digital content

What we offer: Lex Persona offers a unique solution for electronic signature and certification of any digital content. Once your digital content is certified and authenticated, it cannot be forged or modified in any way. It can be freely verified, signed, countersigned and extracted for its designed use without any change. Lex Persona offers streaming capabilities during cryptographic operations, thus allowing the digital signature of large volumes of data.

Collaboration sought: R&D, FP7, Eureka EContec, Joint venture, Licence, Commercial

What are we looking for: Partners sought are distributors, value added resellers, software vendors who wish to integrate digital signature and certification features into their applications.

Librios Ltd

Street: 20 Lochaline Street
City: W6 9SH London

Country: United Kingdom
Telephone:
Mobile: +447979606560
First Name: Hal
Last Name: Robinson
Position: CEO
E-Mail: hal@librios.com

Description: Librios Ltd is based in London, UK with its development office in Milton Keynes, UK. It is a provider of complex CMS solutions and a consultancy for information management. Its main activity relates to knowledge and content management where rich information resources benefit from a common processing environment with multiple parallel input and output requirements (e.g. web, print, etc.). Key markets include health informatics and dynamic reference publishing.

Collaboration Profiles

Title: 'Next Generation' dynamic knowledge and content management
What we offer: Librios Ltd is offering innovative knowledge and content management technology that has proved to be more powerful and flexible than comparable technologies while being easy to use by non-technical operators and also highly cost-efficient. The technology involves innovative database technology with XML-based applications. It can be used for any information-rich content but is particularly useful where such content is continually evolving and/or where complex workflow management is a critical requirement, and where integrated processes are beneficial. Customers in the UK, Netherlands and the USA find it faster, cheaper, and easier to instal and maintain than competitive systems. Most current customers are in the health informatics or information and reference publishing markets but applications are being developed for science research and corporate information management also.

Collaboration sought: Joint venture, Licence, Commercial

What are we looking for Librios Ltd is looking for partners who can help us exploit our proven technology in European and particularly in French markets. Such a partner company may be a joint-venture or a licensee partner and it may be active in commercial, academic or public sectors. The experience of Librios Ltd in health informatics and in information and reference publishing make these good markets to start with. The principal activity of such a partner will be to provide customer service and support; core technology support will be provided by Librios Ltd. Marketing may be handled by the partner or by Librios Ltd or by a combination of each.

London Metropolitan University, Dept. of Computing

Street: 166-220 Holloway Road
City: N7 8DB London
Country: United Kingdom
Telephone:
Mobile: +447905850993
First Name: Professor Algirdas
Last Name: Pakstas
Position: Professor
E-Mail: a.pakstas@londonmet.ac.uk

Description: London Metropolitan University is one of the foremost providers of undergraduate,

postgraduate, professional and vocational education and training in Britain. Our courses are planned in consultation with employers and examining bodies in commerce, industry, the world of art and design, the financial services industries and the professions. The end result is high quality courses that are of direct relevance to their field.

The Department of Computing provides an extensive variety of undergraduate and postgraduate courses. These range from electronic engineering, through networks, mathematics and statistics, a suite of computing and business systems courses, to animation, games and multimedia — about 30 courses in total. The department has 5 major subject areas: Business Systems, Communications Technology, Computing, Mathematics, Multimedia.

Collaboration Profiles

Title: Infinity - 3D Web Browser by Advance Software
What we offer: <http://advance-software.com> is a company collaborating with GameLab London.

1. What is your area of expertise or know how?
Advance Software are experts at creating real-time interactive 3D computer software.
2. What type of innovative technology or research project is being offered?
Infinity - new 3D Internet browser.
Infinity Professional - 3D website content creation toolkit, which works in conjunction with Autodesk's 3D Studio Max (required).

3D website research projects may be initiated at your convenience.

3. What can it be used for?
Infinity can be used to explore and interact with 3D websites.
Infinity Professional can be used to create and extend websites into 3 dimensions.

4. What are the main advantages of your technology over other technologies?
Current browsers do not provide integrated support for 3D browsing. Infinity technology enables websites to be efficiently extended into 3 dimensions, including seamlessly integrated webpages, flash, video, etc.

Collaboration sought: Commercial, Licence, Eureka EContec, Eurostars, FP7, R&D

What are we looking for Activity / tasks to be performed by the partner(s)

1. 3D website research and development.
2. Peer review of new 3D website file format (XSG - Xtensible Scene Graph).
3. Research and development of 3D browser plugin extensions.
4. Additional content conversion tools to/from xsg file format.
5. Webserver software application R&D to generate xsg code on-the-fly (3D search, database query, etc.)

Title: GameLab London
What we offer: 1. What is your area of expertise or know how: Multimedia projects (from Video production to Interactive/Learning Games)
2. What type of innovative technology or research project is being offered: too many to describe.
3. What can it be used for: Learning/Teaching tool for Special needs people (with

impaired sight/hearing, etc.).

4. What are the main advantages of your technology over other technologies: Very often there are NO other technologies at all.

Collaboration sought:

Commercial, Licence, Eureka EContec, Eurostars, FP7, R&D

What are we looking for

Looking for a partner:

1. What type of partner: distributor, research, project partner.
2. Which industry sector: education, entertainment
3. What tasks need to be performed by the partner: distribution, local language adaptation

Manythink

Street: 98, Boulevard de la Révision

City: 1070 Brussels

Country: Belgium

Telephone:

Mobile: + 32476960501

First Name: Olivier

Last Name: Goldstein

Move & Play

Street: 25 rue Henri Barbusse
City: 75005 Paris
Country: France
Telephone:
Mobile: 0033673972682

First Name: Anh-Tuan
Last Name: GAI
Position: CEO
E-Mail: anh-tuan.gai@movenplay.com

Description: Move & Play, a French start-up from INRIA, simplifies personal content libraries management to make it accessible and useful everywhere and for each authorized internet user. Move & Play solution enables content stored on user devices and online storage services to be organized, edited, streamed, synchronized, shared and published, on the go and from any web browser. Move & Play's main activity consists in improving integration: of its software to more devices; of spread content libraries; for edition and publication through external platforms.

Collaboration Profiles

Title: Personal content management platform
What we offer: Move & Play gathers best of peer-to-peer and SOA technologies to enable contents of many devices and platforms to be easily managed by users. Move & Play's unique hybrid architecture gathers peer-to-peer low cost and server availability.

Users can access their content libraries on-the-go to organize albums, edit documents, stream media and synchronize devices. Users can also share contents with groups and contacts directly from their devices or from their online storage service. Finally, users can publish contents on any platform through a widget generic scheme that enables publication to be controlled over time.

The main advantages for users are:

- simplicity to manage many devices and platforms
- more control on personal content with regard to privacy
- independence from platforms.

Collaboration sought: Commercial

What are we looking for Move & Play is looking for a partnership with:

- the multimedia industry (music, movies)
- content library software companies (contacts, agenda, mail)
- devices manufacturers
- Internet & mobile operators
- advertising companies.

City: 81-451 GDYNIA
Country: Poland
Telephone:
Mobile: +48501134311
First Name: Marcin
Last Name: Jablonski
Position: Vice President
E-Mail: marcin.jablonski@connectionpoint.pl

Description: We are the facilitator and support for Polish clusters. We also support foreign companies and clusters in dealing with Polish ones.

Now we are creating Visegrad network of excellence which tighten cooperation among ICT, automotive and energy clusters in Poland, Slovakia, Hungary, Czech and Austria.

During the meeting we will represent ICT clusters:
e-south - BYTOM -which gather providers of first polish IPTV and local telecom operators. They are interested in f.ex. creating content for IPTV and development of passive optical network technologies.

NT Hills -Bielsko-Biala - cluster focused on software development and geolocation (Techmex). Rich access to well educated programmers. the center of excellence in progress.

z@IT - Zilina (Slovakia) - with f.ex. Siemens, Lucent, Tesla. Good univeristy and centres of competence in Zilina makes this place best for companies thinking about development software and hardware. Tight cooperation among all clusters strengthen the opportunity to share all your demands!

Collaboration Profiles

Title: CONNECTIONPOINT - communication hub for clusters, local authorities in Poland
What we offer: We are the biggest cluster organisation in Poland. Our services are: provide wide communication with the Polish market and offer consulting services in the area of ICT business ideas.
Collaboration sought: Commercial, Licence, Manufacturing, Joint venture, FP7, R&D
What are we looking for Depends on projects that might be in our area of interests. We represent more than 70 companies and they not only produce ready to use systems/products but also are able to represent other companies in Poland.

Postmachina

Street: Piet Heinkade 181
City: 1019 HC Amsterdam
Country: Netherlands
Telephone:
Mobile: +31615003323
First Name: Renato
Last Name: Valdes Olmos
Position: Director, Lead Design Aesthetics

E-Mail: renato@postmachina.com

Description: At Postmachina we're constantly thinking about the future. Where others are currently building rich web applications driven by social, user-generated content, we like to think beyond Web 2.0. We like to think beyond the restrictions of the internet. Technology is a gift, but can also be a great burden. We experience this ourselves, every day. That's why we designed E.

Project E is a set of integrated products consisting of wearable/mobile brandable devices. They have the ability to connect users to each other, as well as new or existing services, like social networks. The products create a bridge between the virtual and physical world, and are designed for natural, gesture-based operation.

Collaboration Profiles

Title: E

What we offer: Imagine you're at a conference. Meeting people, shaking hands, exchanging business cards. Once the conference is over and you get home, you're stuck with a gigantic pile of business cards. You'd like to add most of these contacts to you LinkedIn account or your address book. You went out for a post-conference drink with some of the attendees, and would like to add them to Facebook as well. This means you'll have to manually add all these contacts. One by one, and for each networking service again. Some people address this problem by sending each other their contact information through a wireless connection on their cellphones. A process which could take up to several minutes to exchange information.

With E, you get a device which enables the user to exchange contact information with a simple gesture. Hold the devices together for less than a second and they exchange contact information. Once you synchronize the device to a PC or Mac, the information you've collected i

Collaboration Profiles

Title:	Rule based analysis & user interaction
What we offer:	<p>Scientio have unique technology in rule based systems.</p> <p>We have created a set of web services and online tools that permit the user to data, text and structure mine their own data, the result being a set of rules in our proprietary language, Metarule. Users can also encapsulate human knowledge with a simple to use online editor.</p> <p>The web service permits the user to edit and combine rule sets to create rule based solutions. These can be accessed and exploited programmatically via the web service, or via our new questionnaire interface.</p> <p>The latter attempts to satisfy the rule set by presenting questions to an end user and responding to the user when a decision can be made or by triggering an external process. Applications are legal advice, online form filling, governmental, financial web based user interactions.</p> <p>Benefits are low, usage based price, unique fuzzy logic based technology, the ability to</p>

create rule sets by hand or by data mining, all on one platform.

Collaboration sought:

R&D, Joint venture, Licence, Commercial

What are we looking for

Scientio are creator of horizontal products applicable across a wide range of industries. We are looking for partners specialising in particular industry verticals who see our technology as a way of solving problems specific to those vertical markets. We would offer partners development use of our technology, and consultancy to produce specialised applications for their market place. Thereafter we can either supply the technology via a usage based pricing model, or via conventional licensing.

Screen East

Street: 1st Floor, 2 Millennium Plain
City: NR2 1TF Norwich
Country: United Kingdom
Telephone:
Mobile: 00 44 79 03 94 91 87
First Name: Andrew
Last Name: Wheeler
Position: CEO
E-Mail: laurie@screeeast.co.uk

Description:

1. Screen East is based in Norwich and at Leavesden Studios in Hertfordshire where Harry Potter is made.
2. Screen East is a Regional Screen Agency supported by the UK Film Council, EEDA and the Government Office for the East of England.
3. Screen East invests public finance in talent and businesses creating film, television and digital media. It supports the Games Eden and TV Eden business networks and facilitates, with partners, projects such as Wireless Gateway East which is designed to identify 6 technology platforms to make available compelling content for international sporting events.

SEVINGE

Street: ISAAC NEWTON
City: 41092 SEVILLA
Country: Spain
Telephone:
Mobile: 0034687789011
First Name: Carlos
Last Name: Gomez
Position: Dpt. Internationalisation
E-Mail: cgomez@sevinge.es

Description: Sevinge is located in the South of Spain (Sevilla)

Sevinge is an ICT company currently working in the whole country. Sevinge makes software, but we also carry out some consultancy task.

Sevinge offers IT products and services in the area of culture and cultural heritage. Our main products are:

- Management and Maintenance of the Artistic Heritage, Architectural Heritage and Photographic Heritage.
- Virtual Bulletin Board for the Publication on the Web
- Integral Management and Multimedia for Libraries.
- Video Broadcasting on the internet / Intranet.
- Management of Video Library.
- Automatic Management of TV Channels through the Internet.

Collaboration Profiles

Title: @cultura and ITC

What we offer: Our offer is wide but we are now focused on the Cultural Heritage and all the ICT matters having to do with this:

1. Management and maintenance of cultural heritage, architectural heritage and photographic heritage.
2. Management and Multimedia for Libraries and Museums
3. Video and Audio Broadcasting, management of VideoLibrary and management of thematic TV channels in the internet.
4. History Illustrations
5. Software for Architecture (3D...)
6. Virtual bulletin board.

The main advantage of our technology is that it enables the management of all these computer applications from anywhere via WEB (ICM), and thereby allows teams to work simultaneously on the same task. Our server holds all the information, therefore no computer is needed to do this.

Collaboration sought: Commercial, Joint venture, FP7

What are we looking for Sevinge is looking for:

1. Companies that need this kind of computer applications, (museums, libraries, universities...), our products are mainly run by cultural institutions or foundations.
2. Partners working in the ITC area, who can help us to sell our products, commercial and

SOBUZZY

Street: 33 rue Traversière
City: 92100 Boulogne-Billancourt
Country: France
Telephone:
Mobile: +33676877602
First Name: William
Last Name: PERES
Position: CEO
E-Mail: wperes@sobuzzy.com

Description: SoBuzzy (Paris, France) designs, develops and sells virtual on-line showrooms using innovative, interactive real-time 3D technologies.

Our solutions allow Marketing and Communication managers of small and medium-sized businesses as well as bigger industries of all types to present their know-how in a virtual showroom the entire year round.

Exhibiting in a trade show will now take on a completely different dimension: a permanent stand with endless possibilities.

Collaboration Profiles

Title: Virtual Showrooms in real-time 3D
What we offer: The virtual showrooms developed by SoBuzzy are based on an interactive 3D application installed on your web site. The showroom is developed specifically for you with your colours and corporate identity, using textures, characters and items from our catalogues.

Once the stand has been developed and delivered, you can use it indefinitely by paying a yearly user license included in our offer for the first year.

This license gives you access to new versions, corrective updates, as well as a dedicated customer support.

Four predefined packs are available to cater for your virtual exhibition needs. Customised offers are available upon request.

Collaboration sought: Commercial, Licence, Joint venture, R&D

What are we looking for Technical and commercial partners.

SYSTEMATIC Paris-Region

Street: Parc Les Algorithmes
City: 91190 Saint-Aubin
Country: France
Telephone:
Mobile: 0672205769
First Name: Thierry
Last Name: Louvet

Position: International Affairs Manager
E-Mail: t.louvet@systematic-paris-region.org

Description: The SYSTEM@TIC PARIS-REGION is a leading French competitiveness cluster certified by the government in 2005.
It aims at making the Paris Region one of the most competitive areas on an international level in the fields of ICTs, and more specifically in the domain of Software-Intensive Systems (SISs).
The SYSTEM@TIC PARIS-REGION cluster ranks amongst the 7 leading “world class” clusters which stand out because of their international profile and activity.

Collaboration Profiles

Title: Cluster to cluster cooperation
What we offer: The SYSTEM@TIC PARIS-REGION Cluster's choice of applicative/target markets is based on the desire to cover a wide range of briskly growing markets (10% to 20% per year) by offering a host of opportunities (open-ended rules, increasingly open standards and upsurge of freeware) that meet the social needs of major metropolies in the 21st century.
Based on those guidelines, the SYSTEM@TIC PARIS-REGION Cluster focuses on five working groups: Telecoms, Automotive & Transport, Security & Defence, Systems Design & Development Tools and Free & Open Source Software.
The strategic positioning of the Cluster puts it in command of key technologies in optics, electronics and software that will become part of tomorrow's systems.
Collaboration sought: Eurostars, FP7, R&D
What are we looking for other clusters operating in similar fields

Take The Wind

Street: IPN Incubadora Rua Pedro Nunes
City: 3030-199 Coimbra
Country: Portugal
Telephone:
Mobile: +351919698273
First Name: Pedro
Last Name: Pinto
Position: CEO
E-Mail: pedropinto@takethewind.com

Description:

1. Geographical Location: Coimbra Portugal
2. Type of Organisation: A technology based enterprise focused on innovation in new information and communication interfaces and in the learning of biomedical and scientific contents, based on virtual and augmented reality
3. Products and service:
 - 3D films with scientific rigour, allow to travel with a camera inside tha human body, from the biggest to the tiniest level, in the molecular world;
 - Augmented reality;
 - educational dynamic interfaces, enriched by new media, multimedia presentations in 3D environments

Markets: Pharma Industry, R&D Labs

Our interactive and prototyped games can transform learning into rich, immersive, dynamic and multi-sensorial experiences.

Collaboration Profiles

Title:	Biomedical Movies (Take The Wind)
What we offer:	<ol style="list-style-type: none">1. Health and Medical Products, Software applications, specialised IT services2. 3D films and Virtual Reality applications with science rigour, allow to travel with a camera inside the human body, from the biggest to the tiniest level,3. To communicate, focused on innovation, in new ICT interfaces, biomedical scientific contents, RV, augmented reality.4. The synergy between scientifically based virtual reality and its mix with real sounds, images and data is now transforming the way people learn and communicate complex information. The traditional marketing model (pamphlets pens, samples, animated PPT's) is already overstepped. TTW project launches effective means for a total marketing mix and an emotional branding strategy.
Collaboration sought:	R&D
What are we looking for	Take The Wind's participation in this event aims at looking for partners in the same areas of activity who can add value to our project; to open new markets outside Portugal, mainly in the European Union; to create synergies with potential partners

TEKEL

Street: Av. Fontes Pereira de Melo, 35 - 14.º

City: 1050-118 Lisbon

Country: Portugal

Telephone:

Mobile: +351 96 4071830

First Name: Carlos

Last Name: Ribeiro

Position: Owner

E-Mail: carl-tr@versus.pt

Description: Consulting concerns, mathematical simulation models and geometric modeling for engineering projects.

A certified Vocational Training Centre for ICT based matters, which rose since the beginning of 90s.

An innovative learning model for K-12, released in 1999, known as Educacao XXI, now running nationwide within more than 130 schools.

Collaboration Profiles

Title:	Innovative learning and training contents
What we offer:	Attractive learning contents and ICT based activities guidances for teachers in K-12 schools, about the discovery of knowledge and curricular areas relationship; e-Learning contents for vocational training concerning ICT areas, administration and management, image processing technology (computer graphics and CAD systems) and engineering design. These solutions are ready to deliver as products/service to be licensed to schools and training institutions but flexible enough to be customised and easily upgraded.
Collaboration sought:	Commercial, Eureka EContec, R&D
What are we looking for	- SME dealing with education and training markets who want to become national and local distributors and supporters of our learning and training sets. - Research teams or suppliers of further innovative solutions concerning e-learning, educational software, image processing, virtual reality, simulation and visualization technologies, maybe having their own product or new technologies to be integrated with our own solutions.

Victor3D

Street:	Rue de la Station, 6
City:	1332 Genval
Country:	Belgium
Telephone:	
Mobile:	+32 (0) 498 88 06 39
First Name:	Stéphane
Last Name:	Rigotti
Position:	Director of Sales & Marketing
E-Mail:	stephane@victor3d.be

Description: The company Victor3D is specialized in the creation of visual effects and synthesized images animated for publicity, full-length and short film, the documentary, the corporate and television. In 10 years, Victor3D has built an impressive list of customers and references among which are film directors, agencies, reputed Belgian and international companies and recognized productions.

In order to meet the many needs for the French-speaking cinema of the South of Belgium, Victor3D has opened in 2007 a second operational centre in Genval (Belgium). This entity recognized by the regional authorities confers an eligibility to the Walloon financing programs of the audiovisual (called "Wallimage" and "Promimage").

Collaboration Profiles

Title: 3D Visualisation

What we offer: The range of services that we offer is broad and complete. It is illustrated by the following activities:

- Supervision and consultancy for the realization of special effects.
- Storyboarding of the sequences of special effects.
- Pre-visualization of the sequences of special effects.
- Realization of digital special effects and of 3D-elements to be inset.
- 2D and 3D matte painting.
- Inlay of synthesized images in "live" scenes (traditional film).
- Full 3D animation.
- ...

Victor3D is composed of teams of dynamic creatives and qualified technicians who are entirely assigned to the production for meeting your expectations. Concerned and attentive with the new tendencies, we follow very closely their evolution. We can ensure the exit of the images on any support and format, in all current compressions.

Conscious of the budgetary constraints, we study with the production and the film director, the various possibilities of realization of the plans to "disguise". We always endeavour to find the best solution as well from the point of view of the image as from the point of view of the budget.

Throughout shooting and post-production, one of our special effects supervisors can accompany the film director and the producer, in order to constantly answer to their expectations.

The company Victor3D s.a. is active on the segments of the publicity (50%), the cinema (30%) and the corporate (20%).

In the era of the "all digital", the visual productions are more and more required. This global positioning is centred on a level of premium quality while associating a very important flexibility and a creative level.

The segmentation is carried out by sectors of application:

- Advertising

In this field, Victor3D proposes its services as intermediary nearby production companies.

Two types of services are proposed:

- * Creation of spots;
- * Adaptation of spots: packshot, tag and « product » demo.

These services require both an high level of creativity as well artistic as technical.

- Cinema industry

For the cinema, Victor3D positions his offer "cinema" through his pole of competences of Genval (in partnership with STATION 6, a studio for sound and dubbing), so much on the level of the special effects than of 3D and 2D animation.

- The Corporate sector (company film)

Victor3D proposes two distinct offers of service:

- * The "Full 3D" films: from storyboard to the final step.

Collaboration sought:	* The films with a mix of real and 3D images in partnership with a production studio. Commercial, Licence, Joint venture, Eureka EContec, Eurostars, FP7
What are we looking for	Projects that need 3D visualisation services to clarify any complex process or to show in motion what normally couldn't be shown.

Vienna Business Agency/VITE

Street: Meldemannstraße 18
City: 1200 Vienna
Country: Austria
Telephone:
Mobile: +4369914947528
First Name: Bernhard
Last Name: Schmid
Position: Project Manager
E-Mail: schmid@vite.at

Description: Vienna IT Enterprises (VITE) is the network for IT companies, research, development and educational institutions located in Vienna Austria.

Medium-term and long-term objectives of Vienna IT Enterprises are:

- strengthen the innovative power and competitiveness of our partners,
- strengthen international competitiveness,
- increase the name recognition of our members
- increase the name recognition of Vienna as an excellent IT location

The main targets of VITE are raising and strengthening awareness for the value of cooperation and the linking of existing skills by offering a platform for the implementation of ideas and initiatives.

Collaboration Profiles

Title: Vienna IT Enterprises

What we offer: The VITE Calls and Tenders database provides interesting up to date, IT-relevant calls and tenders from Austrian and European funding programmes that can be easily and quickly found. On a regional level, these calls focus on the countries of the European Union and target countries of their third country programmes. Concerning the context there is a focus on the topics that VITE partners are dealing with.

The database is daily updated and has a distinguished search tool that quickly offers enterprises regionally and thematically filtered information. Furthermore, from now on, all partners have free access and can benefit from more transparency in the calls and tenders "jungle".

VITE Project Angel offers active and focused support to SMEs so that they can successfully participate in European calls as well as in national and international tenders. The goal is to support the companies in such a way that they can completely concentrate on their products and services.

Collaboration sought: Joint venture, FP7

What are we looking for: We are looking for possible project partners (other IT Cluster or organisations) which would implement a similar system - maybe together within an EU Project. If more regions offer these services, there would be a synergy effect and it would enable more international co-operations.

Virtual Experience - The 3D Company

Street: Tengstr. 27
City: 80798 Munich
Country: Germany
Telephone:
Mobile: +49-177-4334577
First Name: Jérôme
Last Name: Hamacher
Position: CEO
E-Mail: b2b@virtual-experience.de

Description: Virtual Experience - The 3D Company - produces stereoscopic three-dimensional movies. Its headquarters are in Munich, Germany. Our service embraces technical equipment facilities, 3D consultancy, the complete production, the screening, and duplication. DCI compliant DCP of JPEG 2000 for D-Cinema distribution.

1. Munich, Germany
2. stereoscopic 3D film production services, consulting and distribution
3. distribution of stereoscopic 3D movies for science center, museums, motion rides and D-Cinema entertainment.
4. Research and Teaching for stereoscopic media production on the field of live action shooting and 3D animation. Research on content adaptation from handheld (DMB, HMD) to IMAX like large format as well as autostereoscopic displays. 3D-Content Partner of the European DMB-Project MIFRIENDS.
5. Innovation Awards:
Deutschland Land der Ideen 2008, Munich, Germany
Mobile Content Award, Cannes, 2006, Cannes, France

Collaboration Profiles

Title: Alternative Content Distribution for D-Cinema

What we offer: Virtual Experience is specialized in 3D-Distribution for D-Cinemas and special venue Exhibition. We are looking for International partners in Distribution and financing of alternative D-Cinema Content.

We cooperate with hardware manufacturers interested in exploring and defining new communication languages offered bei new media.

As new Hardware regarding Displays, Mobile Devices and D-Cinema technology is progressing fast. We research technologies and partners to develop european content production and international distribution.

3D content offers higher entertainment value. As a premium product 3D allows differentiation from competitors and raises higher revenues than conventional content.

Collaboration sought: R&D, FP7, Commercial
What are we looking for Experts in Digital Cinema (DCI/ISO). Content providers and distributors.
Cofinancing Partners.

VIRTUALDIVE

Street: 12 allée des Grands Clos
City: 78590 Noisy-le-Roi
Country: France
Telephone:
Mobile: +33(0)685083682
First Name: Alain
Last Name: DINIS
Position: Director
E-Mail: adinis@virtualdive.com

Description: VirtualDive is specialized in Information Technologies related to the subaquatic environment.
We are currently developping 3 products :
- 3D real-time virtual representations of underwater sites
- A scuba diving multimedia simulator for swimming pools
- An "edutaining" video game diving simulation
Our company has been selected by the French National Research Agency (ANR) for its R&D project called Digital Ocean.
VirtualDive is also labelled by 2 major competitive poles : Cap Digital and Pôle Mer PACA.

Collaboration Profiles

Title: VIRTUALDIVE : Information Technologies applied to underwater simulation
What we offer: VirtualDive has developped innovative solutions with no direct competitors. Its products will offer new usages of IT technologies and new services to our clients.
- Our diving simulator for swimming pools is aimed to bring interactivity and multimedia animation on this aquatic equipment. Hotels, community pools, diving clubs, spas... will be able to offer a new attraction to their clients by bringing audiovisual contents and video games on the pool.
- Our interactive 3D diving sites allow cities and diving clubs to promote subaquatic tourism of their region. Our technology can also be used for environmental issues.
Collaboration sought: Commercial, Licence, Manufacturing, Joint venture, Eureka EContec, FP7, R&D
What are we looking for We are searching for industrial or academic partners in several IT fields (mecatronics, virtual reality, simulation, video games, marine sonar acquisition, online collaborative platforms, stereoscopy and LED displays) in order to enter a european R&D program. Industrial partners interested in a joint venture, manufacturing or a commercial partnership are also sought.

Waag Society

Street: Nieuwmarkt 4
City: 1012 CR Amsterdam

Country: Netherlands
Telephone:
Mobile: +31 6 50 576 449
First Name: Frank
Last Name: Kresin
Position: Programme Manager
E-Mail: frank@waag.org

Description: Waag Society is an Amsterdam based Media Lab founded in 1994, developing and researching creative technology for social innovation. We develop demonstrators, prototypes and products in collaboration with companies, museums, educational and health care institutions and governments. Our results have found their way into the hands of users, artists and scientists world-wide. These include an on-line platform for location based gaming, tactile interfaces for communication between handicapped and elderly, story tables for social well-being and many others.

Collaboration Profiles

Title: Location Based Heritage
What we offer: Location Based Heritage will work with heritage institutions to provide a location based platform for access to items from the collection on the locations that matter to them. We will use mobile technology to put images, text, video and audio on-line and distribute them in public space. By this, we get access to a new and younger public, giving them means to both access content, use gaming principles and put their own content on-line.

Waag Society offers a location based gaming platform that will be adepcted to suit these tasks. Our technology makes it possible to access heritage information, to use games templates to interest and motivate users, to 'play' solo or in teams, to deepen experiences and provide feedback to be included in the collection. This technology is unique in its features and versatility.

Collaboration sought: R&D, FP7

What are we looking for We look for interested cultural, scientific and commercial partners to bring the technology and the knowledge needed to apply it further. In the end we want to develop a European service for heritage and cultural institutions and build an provide access to virtual cultural collection.

Position: CEO
E-Mail: andrew@trainagain.co.uk

Description: Based in Cambridge and serving SMEs across the East of England, this Wireless Gateway cluster is helping SME collaborations to develop and refine wireless product and service ideas relating to internation business and consumer events (e.g. s[sports; music; conferences]).

Collaboration Profiles

Title: Wireless Gateway
What we offer: Collaboration in the field of wireless solutions for international events.
Collaboration sought: R&D, FP7, Commercial
What are we looking for: In particular we are looking for potential partners in the coastal regions of Belgium or Holland

WYSIWYG

Street: ZA FRANCIS COMBE N°15
City: 95000 CERGY
Country: France
Telephone:
Mobile: +33662084509
First Name: Xavier
Last Name: Lopez
Position: CEO
E-Mail: xl@wysiwyg.fr

Description: WYSIWYG is situated in Paris, France. We have a datacenter that enables us to be an ASP and SAAS provider.
We are also active as a consultant in the field of supply chain and quality. We have been recognized as an innovative company by OSEO and have raised funds with the help of a venture capitalist in 2007.
We have integrated all servers possible for being able to offer an information system online 24/7 from anywhere worldwide

Collaboration Profiles

Title: ASP SAAS PROVIDER
What we offer: ASP Provider
SAAS provider
Consultant in ERP QUALITY and IT

Unique datacenter with secret know how of integration even in virtualized servers and applications.

No investments needed and datacenter ready for experimentation of collaborative work and business. Certification ISO27000 under way and already certified ISO9001

Collaboration sought: R&D, FP7, Joint venture, Commercial

What are we looking for: Investor or partner for development especially marketing and sales.
We are able to be casted all over the world efficiently and in respect of sustainable development.
We'd like also to accelerate graphics on remote client and mobile desktop.

XIHA Ltd

Street: Pursilahdenranta 2 D 42

City: 00980 Helsinki
Country: Finland
Telephone:
Mobile: +358405430825
First Name: Juhani
Last Name: Polkko
Position: VP Business Development
E-Mail: juhani@xihalife.com

Description: XIHA Ltd is a Finnish company operating worldwide with top countries like e.g. China, U.S., Brazil, France and Spain.
The company develops and operates the world's first multilingual social network service XIHA Life and the state of the art technology platform behind it. In addition to social networking features, XIHA Life includes a digital content store with integrated virtual monetary and payment systems.

Collaboration Profiles

Title: Multilingual Social Network XIHA Life Creates Cross-Cultural Connections
What we offer: Targeted at people living outside their home country, XIHA Life allows efficient communication and content sharing across cultures and language barriers.

XIHA Life (<http://www.xihalife.com/>), a new social network targeted at multilingual people living outside their home country, introduced new features at the Web 2.0 Expo. For the first time, social network users can select multiple languages to communicate and share content with, enabling multicultural communities to form across the globe.

"Online social networking is obviously proven to be much more than a fad, a global phenomenon bringing people together and creating new type of media and communication networks. However, after going through all the leading services, we discovered a serious flaw which is common to all of them. As users typically can only select one primary language, user communities are formed around a single language.

Collaboration sought: Commercial, Eurostars
What are we looking for: Digital content providers

XiLabs

Street: 12 rue Vivienne
City: 75009 Paris
Country: France
Telephone:
Mobile: +33686839428
First Name: Ivo
Last Name: Flammer
Position: CEO
E-Mail: ivo.flammer@xilabs.fr

Description: XiLabs is a Paris-based, 2007 start-up which is active in the service sector. XiLabs realizes a new kind of games: URBAN GAMES.
Xilabs invents, develops and realizes its games.
In Urban Games, also called Pervasive Games, the game field is your city. Urban Games rely on the ambiguity between the real world and the game universe. Compared to

conventional video games, Urban Games include physical and social relevance: they fit perfectly into today's social trends of "community", "body" and "here & now". The technological driver of Urban Games is the mobile phone.

XiLabs' expertise is scenario and gameplay of Urban Games. We are specialists in Pervasive Integration: solutions for integrating mobile services into the user's daily life. XiLabs has two technological platforms: a DTMF platform for all-users / all telephones and a Java platform.

Our clients use our games a) as marketing / image tools b) as test fields for prototyping mobile technology or services, c) as informative or educational games (serious games) and of course d) as permanently available service for city-games on the gamer's mobile phone.

XiLabs invests strongly in R&D. The exploration of Urban Games invests in a fashionable and exciting territory, it attracts researchers in various disciplines: mobile services, city-planners, sociologists, engineers, artists, and psychologists.

Collaboration Profiles

Title: XiLabs

What we offer: XiLabs realizes a new kind of games: URBAN GAMES, also called PERVASIVE GAMES.

XiLabs invents, develops and realizes its games.

In Urban Games the game field is your city. Urban Games rely on the ambiguity between real world and the game universe. Compared to conventional video games, Urban Games include physical and social relevance: they fit perfectly into today's social trends of "community", "body" and "here & now". The technological driver of Urban Games is the mobile phone.

XiLabs' expertise is scenario and gameplay of Urban Games. XiLabs has two technological platforms: DTMF platform for all-user / all telephone and a Java platform. Our clients use our games a) as marketing / image tools b) as test fields for prototyping of mobile technology or services, c) as informative or educational games (serious games) and of course d) as permanently available service for city-games on the gamers mobile phone.

Collaboration sought: Commercial, FP7, R&D

What are we looking for

XiLabs is looking for distribution partners or research partners.

Distribution partners for implementation of our urban games either for marketing/exploratory events or for permanent use on the gamers' mobile phones. We can also imagine a joint development of a specific urban game together with our partner.

Research partners for investigating/developing more general mobile service applications. XiLabs is especially interested in pervasive and game/fun applications.
